

And Now For Something a Little Different: An Introduction to Cataloguing in the Web Client

New Features

Copy Alerts

Copy Alerts allows you to add customized alert messages to copies. The copy alerts will appear when a specific event takes place, such as when the copy is checked in, checked out, or renewed.

Working Copies

Working copies allows you to add multiple copies that do not share the same attributes.

Record Merge Profile

“Merge Keeping Local Fields” allows you to merge duplicate records and systematically keep the local fields (59X, 595, 69X, 856)

New Behaviour

Volume/Copy Templates

Volume Copy templates allows you to set up default values for selected volume and item attributes. Volume/Copy templates have their own tab in the Volume/Copy editor.

Volume/Copy Defaults

A new **Defaults** tab in the copy editor allows you to disable some fields in volume and copy records. Disabled fields are still visible in the copy editor but cannot be edited.

Create New MARC Record - old non-RDA MARC record templates have been removed.
