***The fixed fields editor fields will change based on the value in Item Type (LDR position 06)

LDR = Fixed field that comprises the first 24 character positions (00-23) of each bibliographic record and consists of data elements that contain numbers or coded values that define the parameters for the processing of the record.

<http://www.loc.gov/marc/bibliographic/bdleader.html>

006 = Eighteen character positions (00-17) that provide for coding information about special aspects of the item being cataloged that cannot be coded in field 008. It is used in cases when an item has multiple characteristics and to record the coded serial aspects of nontextual continuing resources.

<http://www.loc.gov/marc/bibliographic/bd006.html>

007 = The data elements in field 007 are positionally defined and the number of character positions in field 007 depends upon the code contained in 007/00.

<http://www.loc.gov/marc/bibliographic/bd007.html>

008 = Forty character positions (00-39) that provide coded information about the record as a whole and about special bibliographic aspects of the item being cataloged. These coded data elements are potentially useful for retrieval and data management purposes.
